All-in-One

CureMD is the leading provider of innovative health information management solutions that transform the administrative and clinical operations of healthcare organizations of all sizes.

The award winning CureMD platform delivers complete information and evidence based knowledge when and where required — facilitating informed and effective decision making to improve the quality of care, practice performance and patient experience.

Electronic health records, specialty content, practice management, enterprise scheduling, intelligent billing, workflow management, KPI dashboards, eRx, e-Labs, document imaging, clinical knowledgebase, clinical alerts, device / HIE connectivity, patient education, data mining reports and patient portal.

Hosting, implementation, support, backup, security, updates, maintenance, data migration, e-Fax, credit card processing, text messaging, patient statements, transcription, training and consulting.

Electronic Health Records

Connect - Collaborate - Transform

Our certified web technology and integrated approach to service delivery enables continuity of care management and information sharing across multiple platforms, systems and organizations - driving greater collaboration, productivity and safety.

Reducing cognitive overload, supporting unique workflows and clinical approaches, our specialty specific, template-driven, point and click technology ensures accurate, complete and faster documentation.

CureMD simplifies decision making, streamlines operations and ensures compliance with industry standards and best practices, ultimately saving time and effort to maximize value and returns.

- Streamline MU reporting
- Process higher patient volume
- Improve care quality using standardized treatment plans and best practice guidelines
- Accelerate collections with online eligibility; patented E&M calculator, electronic billing, clean claim checks and EDI
- Reduce charting time with collaborative care management
- Save time by eliminating redundant data entry, automated information capturing and voice recognition
- Develop patient and condition-specific treatment plans
- Utilize structured data for clinical trials, research and reporting

Specialty
Focused

CureMD provides rich specialty content, template library and custom forms for single and multi-specialty practices of all sizes - ensuring effective and high quality care delivery. Point-and-click, default data selection and import from prior visits with integrated voice recognition expedites encounter speed and order processing.

Award winning usability, workflow editor, template designer and other customization tools support your unique style, preferences and priorities.

CureMD offers a very powerful program as it collaborates EHR with billing in a way that I never imagined. It is really an All-in-One solution as I am able to look after my Physical Medicine and Rehab practice like never before.

Dr. Josephine Huang
Josephine Huang, PLLC

CureMD stands out from the rest due to cloud-based service and usability. It was very important for us to have patient data available across our six centers; They have brilliant support and whenever we need them, they are available.

Dr. John Muney
AMG Medical Group

CureMD has made my practice workflow faster, quicker and hassle free. For 6 years, I've found their practice management solution to be the best. I can submit claims for the day with just a click which has made my life a lot easier.

Dr. Elizabeth Lee-Ray
Eastchester Medical Associates

Avalon for iPad

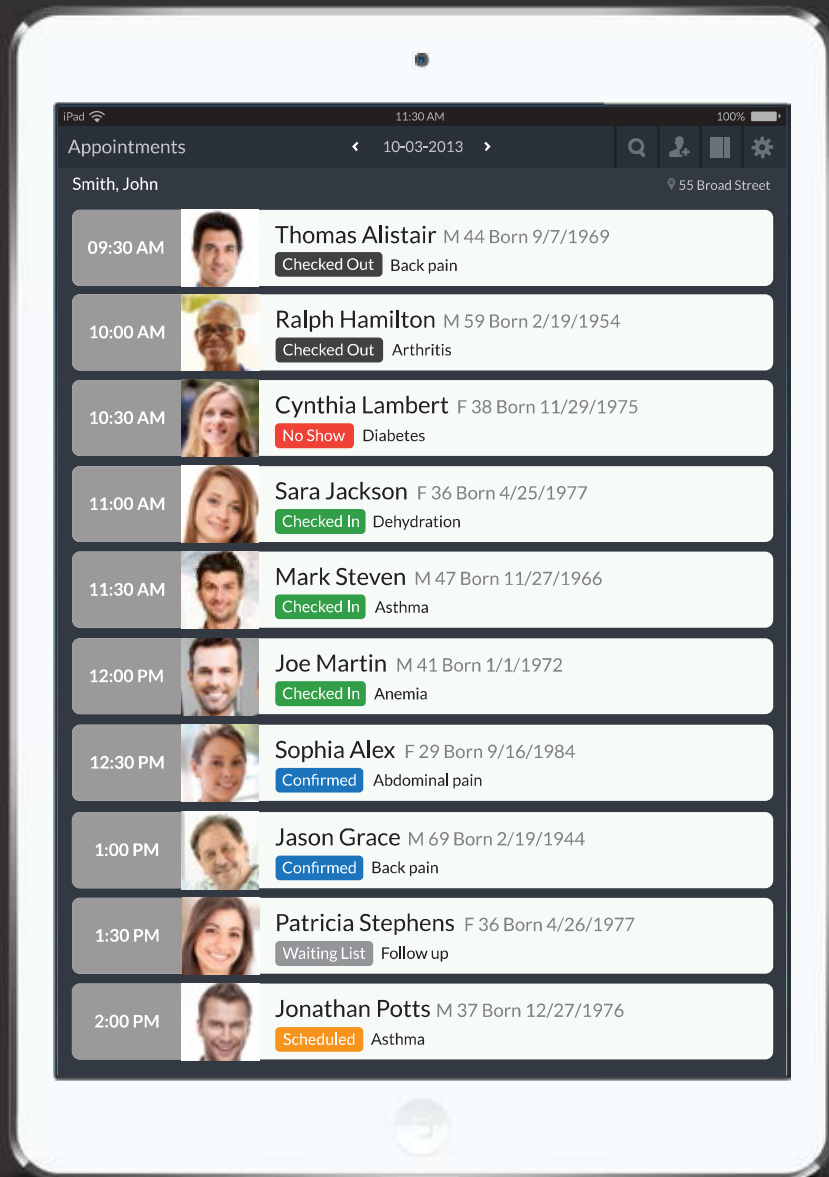

Forward Thinking

Designed specifically for the iPad, Avalon expedites charting, improves accuracy and ensures portability. It brings together a radical design and an innovative user experience that is rich and intuitive. Avalon provides the power of CureMD EHR in a portable package to provide users an instantly familiar feel with improved mobility.

Revolutionary user experience

Bringing groundbreaking research to life, Avalon enhances productivity and the bottom line of your practice.

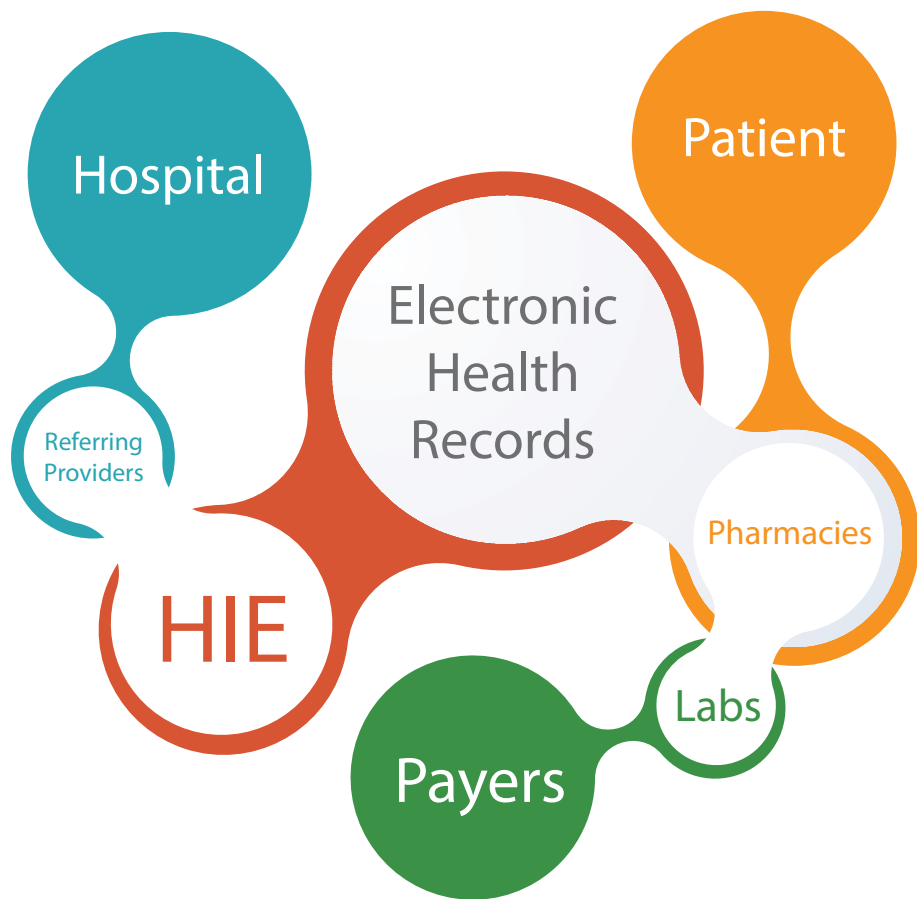

Why CureMD

- True web-based technology
- Integrated, interoperable and customizable
- Enterprise-grade functionality

- ICD-10 Ready
- Fast Track implementation
- PQRS / P4P / HEDIS Ready
- Top rated customer support
- Hassle-free maintenance and upgrades
- 99% uptime guarantee
- HIPAA compliant

Improve

20 years of
ambulatory care
knowledge

Interoperability

Designed for next generation interoperability, CureMD enables seamless information exchange across all stakeholders. Connect with:

- Health information exchanges
- Labs for electronic orders and results
- Pharmacies
- Payers
- Radiology / imaging services
- Hospital networks
- Referring providers
- Patients
- Syndromic surveillance agencies
- Immunization registries
- Specialty registries
- Electronic devices
- DICOM compliant imaging equipment

Award Winning Usability

Not only is CureMD highly adaptable and easy to use, but it is 'smart' too.

It learns from you while you work and mimics your unique styles and practice preferences; leading towards effortless documentation and speed.

Architecture

CureMD combines proven technologies and industry standards to ensure your infrastructure remains:

- Secure
- Scalable
- Always Available

Cloud Hosted

A low monthly subscription includes hosting, support, upgrades, maintenance, security, and business continuity services; eliminating upfront expenditure on software, hardware and IT administration.

Client Hosted

Larger practices with dedicated IT staff can keep their own server with CureMD installed for local and remote access - keeping data in their own office with greater control and flexibility.

Patient Safety

For quality, safety, security and interoperability, CureMD supported initiatives include:

- Leapfrog
- DOQ-IT
- QualityNet
- NCQA
- JCAHO
- HEDIS

MU Guaranteed

CureMD EHR will meet the Meaningful Use certification criteria. Period. If not, we will credit up to 12 months of support fees. Guaranteed.

Security & Privacy

CureMD employs advanced security and certified business continuity systems that prevent data loss while keeping your information secure, private and accessible.

- Access Authorization
- Role Based Access Control
- Release of Information
- Activity Monitoring
- Audit Trail
- 256 Bit SSL Encryption
